Agenda for the Q3 meeting of the Asian Legal Network August 12th 2015, Oberoi Hotel, Bangalore, India

Our theme is: "**Driving Innovation and Scalability with Free and Open Source Software (FOSS)**"

India's software companies are defining a new wave of innovation and creativity. While the software services sector has built a powerful, \$100 billion industry, the new, emerging product companies are going head to head against global MNCs, or creating unique software products for Indian consumers. Over the last few years, India has clearly become a fertile ground for innovation and entrepreneurship, much of it built on the foundations of FOSS. What are the global trends in FOSS, how is the ecosystem evolving, and how can technology companies make the best use of FOSS? To discuss these issues, we have an eminent panel of Indian and global innovation experts.

Time	Session	Speaker
12PM-1.30PM	Lunch
